Transportation Solutions

LUTZE has been developing and manufacturing electronic and electrical engineering solutions for controls and installations for more than 50 years. Our basic concept as a system supplier for factory automation is to provide a comprehensive and wellmatched product range.

LUTZE Servo cable assemblies according to BOSCH REXROTH[®].

LUTZE has a long standing reputation as a manufacturer of factory automation cables. These high performance cables are now available preassembled to connect your BOSCH REXROTH® servo drive systems.

LUTZE servo cable assemblies are fully suitable with BOSCH REXROTH® drive systems. As a special service LUTZE offers each cable assembly in custom lengths of 0.5 m increments.

The product offering includes all power and feedback sizes. In addition, raw cable is available for field assembly. There is no minimum order amount, delivery times are short and there is a cost-effective price/performance ratio.

LUTZE systems comply with the highest industrial standards, LUTZE solutions mean improvement and innovation. Our solutions include components and concepts suitable for almost any automation application.

Motor and servo feed by means of maximum

Your efficient connection to the drive

Are you looking for the right connection between the control cabinet and the drive? LÜTZE can offer you a complete solution from one source. 100% compatible to standard servo systems: Quality is LÜTZE's top priority.

LÜTZE cables are specially designed for rough industrial environments which exceed some standard requirements.

Or are you looking for a very individual solution? We adapt cable assemblies to meet your requirements. Just ask us! We have a wide range of cables, connectors, protective hoses and openings to choose from - all readily available!

The LÜTZE cable specialists are familiar with all applications and technologies in the broad field of automation solutions. Ultimately,

LÜTZE and its product ranges Cable, Connectivity, Cabinet and Control are a part of the industrial automation field!

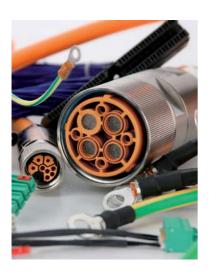

back: Best possible efficiency power transmission

Full power in all drive situations - the low-capacity cables from LÜTZE have the lowest losses which means that the maximum output can be transferred as a ratio to the cross-section. The special LÜTZE cable design therefore offers a maximum of efficiency and also helps to save energy.

Assemblies for the following standards

Moulded closed

LÜTZE Tamper-proof connector plastic moulded round plug connectors M23 for industrial use offer the user an economical and, at the same time, safe solution for the electrical connection of machines and systems.

The LÜTZE program contains various termination numbers and cable lengths. This means terminations of 6 - 28 and transfer outputs of up to 30 A

at 630 V, and therefore robust, safe cabling is available for numerous signal and power applications.

The integrated protection against kinking and the inner metal housing with 360° EMC shielding ensure the cable assemblies meet the requirements for the industrial sector - they really are sealed shut

Other benefits:

- Tamper-proof: To prevent the connector casing from being opened or wrong connections within the connector
- · Integrated anti-kink device
- 100 % compatible with BOSCH REXROTH®, SIEMENS®, Allen-Bradley®...
- Production of single unit available
- · Available at short notice
- Protection class IP66/67

Helical cables - Manufactured to meet your specifications, our helical cables are suitable for high mechanical loads such as high-performance machines, lifting

platforms and lots of other moving applications. Also highly suited for use outside for millions of load changes without failure!

Customer-specific solutions

Each installation is different.

Therefore, make use of our cable assembly expertise; experts will plan your project and document your application making use of a

product range containing more than 1700 cables, connectors, strain relief elements and protective hoses.

Servomotor cables for C-tracks

According to Bosch Rexroth RKL standard

Application

Motor cable for Bosch Rexroth SERVO drives

Full PUR jacket and TPE conductor insulation optimally suited for c-tracks, extremely rough operating conditions, aggressive coolants and lubricants

Properties

Silicone freeRoHS-compliant

PVC servo cables · C-track compatible · shielded

LÜTZE SUPERFLEX® PLUS M (C) PUR SERVO 0.6/1 kV Supply line for Bosch Rexroth and other systems For highest requirements

Application

- For Indramat* system (and similar)
- Connection cable motor/brake especially for frequency converters and SERVO drives in machine and plant construction, transport
- and conveyor technology
 Due to Full PUR jacket and TPE / HGI conductor insulation optimally suited for c-tracks, extremely rough operating conditions and aggressive coolants and lubricants
 Especially for industrial environments in mechanical and system
- engineering

Properties

- High active and passive interference resistance (EMC) Braided shield optimised for continuous flexible use

- Very good alternating bending strength Low adhesion, abrasion-resistant, nick-resistant, tear-propagation-resistant
- Hydrolysis-resistant, microbe-resistant, and rot-resistant Weatherproof, ozone and UV resistant (normal lighting condi-
- Good ruggedness and salt water resistance
- Excellent coolant and lubricant resistance
- Resistant to most oils, greases, alcohol-free benzines and kero-
- Silicone free
- RoHS compliant

Handling and Installation LÜTZE SUPERFLEX® – Quick Overview

1. Selecting Cables for Continuous Motion Applications – C-Tracks

We recommend special high flexing cables such as LÜTZE SUPERFLEX® cables, for use in C-tracks to ensure long life times:

- LÜTZE SUPERFLEX® cable is proven to be compatible with all major brands of C-tracks.
- LÜTZE SUPERFLEX® N is designed for moderate flexing in short to medium length C-tracks.
- LÜTZE SUPERFLEX® Plus PUR is designed for high performance flexing or longer C-tracks.

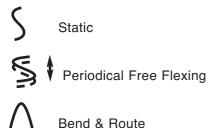

High Flexing Cables such as LÜTZE SUPERFLEX® cables are different from standard flexible cables:

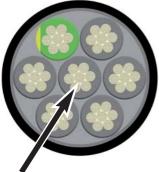

Standard Flexible Cables - LÜTZE SILFLEX®

long pitch

- · Low number of strands per conductor
- · longer pitch layering
- designed as a pliable cable for easy routing and installation

- · no central core
- · mostly PVC as insulation material
- · foil shield or braid shield
- · jacket material depends on application

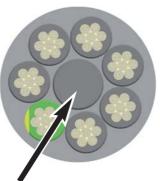

High Flexing Cables – LÜTZE SUPERFLEX®

short pitch, layered design with control core

- · high number of super fine strands per conductor
- · short pitch layering
- · conductors are cabled without mechanical back twist
- · higher quality of materials
- slower and more complex manufacturing process on high-end equipment
- · designed for linear constant flexing

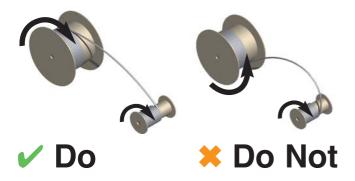

- central core for single layer construction
- special PVC or TPE as insulation material
- · tinned copper braid shield
- high abrasion resistant jacket material such as PUR

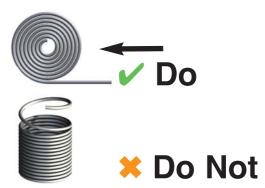

Handling and Installation LÜTZE SUPERFLEX® - Quick Overview

2. Correct Handling of LÜTZE SUPERFLEX® Cables

When unreeling the cable, do not change the bend direction. The cable has to go on the new reel in the same direction it came off the reel. Low and equal tensile force during spooling!

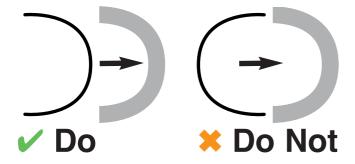

Ring put ups require careful uncoiling by rolling the ring upright over the floor

Do not twist the cable when unwinding. always unwind straight from spool.

3. Correct Installation of LÜTZE SUPERFLEX® Cables

Cable retains bend from reel. Do not flex against original bend or relax cable for 24 hrs by laying it flat.

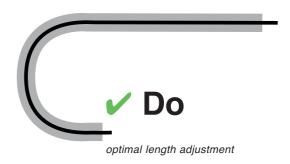

Use dividers horizontally and vertically to separate the track into separate cavities. Install just one cable per separated cavity. If absolutely necessary, two small or a small and a big cable can share a cavity.

Try to ensure balanced weight distribution. If you have more than one heavy cable, we recommend installing the heavy cables evenly to each side of the track.

Observe the minimum bending radius for optimum performance. Make sure that all cables are length-adjusted and run in the neutral zone.
