U.S. PANORAMA

Softstarters
Type PSR, PSE and PSTX

ABB softstarters
A part of your motor starting solution

Motors use almost one third of the world's generated electricity. So it is safe to say that reliable motor operation is crucial to our modern way of life.

Why motor starting matters

42%
of all electricity used powers industry

2/3
of this is used by electric motors

= 28%
Global electricity consumption

Around 90%
of all these motors run in full-speed. It is important how we operate them.

ABB softstarter
is a full-speed starter that accelerates, decelerates and protects three phase motors.

Motor starting solutions

DOL and Y/D
Direct start and stop
Full speed application

Softstarters
Soft start and stop
Full speed applications

Drives
Soft start and stop
Variable speed applications

Typical torque and current curves from starting a motor using DOL, star-delta and softstarter.

Torque

Common applications for Softstarters

Centrifugal fan
Soft starting adjusted to application
It is possible to adjust the settings to fit almost any starting condition, from unloaded to fully loaded.

Centrifugal pump
Eliminating water hammering with torque control
The ABB softstarter feature torque control stop eliminates water hammering and prolongs the lifetime of the system, while reducing pump downtime.

Compressor
Full control of current with current limit
The feature current limit makes it possible to start the motor securely even in a weaker network, improving the availability of the equipment and system. Reducing the current means reducing the stress on cables, network and motor.

Conveyor belt
Avoid overheating with overload protection
ABB's overload protection feature shuts down the motor in case of overload, avoiding overheating.

ABB softstarters
Overview

THE ADVANCED RANGE
PSTX

Key features
- Multiple different start and stop ramps
- Built-in bypass for energy saving and fast installation
- Detachable IP66/4X outdoor keypad
- 3 DI, 3 DO, 1 AO, PTC/PT100, Built-in Modbus
- Complete motor protection
- Extensive functionality

Technical data
- Operational voltage: 208-600 and 208-690 V AC (2 frames)
- Rated control supply voltage: 100-250 V AC, 50/60 Hz
- PSTX rated operational current: 30-1250 A (inside-delta: 2160 A) (6 frames)
- Three-phase controlled
- Both in-line and inside-delta connection is possible

Certifications and approvals:
- CE, cULus, CCC, EAC, ANCE, C-tick, ABS, DNV GL, Lloyd's Register, CCS, PRS, Class NK

THE EFFICIENT RANGE
PSE

Key features
- Soft start/stop with voltage ramp and torque ramp
- Built-in bypass for energy saving and fast installation
- Easy set-up with graphical display
- Run, TOR and event output relays, AO
- Basic motor protection and current limit

Technical data
- Operational voltage: 208-600 V AC (1 frame)
- Wide rated control supply voltage: 100-250 V AC, 50/60 Hz
- Rated operational current: 18-370 A (3 frames)
- Two-phase controlled

Certifications and approvals:
- CE, cULus, CCC, EAC, ANCE, C-tick, ABS, DNV GL, Lloyd's Register, CCS, PRS, Class NK

Normal start overview: PSR, PSE and PSTX

PSTX SOFTSTARTER
HMI
Key features
- Customizable display for important status information
- Application assistant for fast and easy set-up
- IP66 (1, 4x outdoor, 12) protection against water and dust
- Easy to use with the large back-lit graphical display
- Detachable HMI for easy panel door mounting
- Set-up and firmware update the PSTX with USB connection - no need of supply or main voltage

THE COMPACT RANGE
PSR
Key features
- Soft start/stop with linear voltage ramp
- Built-in bypass for energy saving and fast installation
- Set-up with 3 potentiometers
- Run & TOR output relays
- Few items to stock – in total only 4 frame sizes

Technical data
- Operational voltage: 208-600 V AC (1 frame)
- Wide rated control supply voltage: 100-240 V AC, 50/60 Hz or 24 V AC/DC
- Rated operational current: 3-105 A (4 frames)
- Two-phase controlled

Certifications and approvals:
- CE, cULus, CCC, EAC, ANCE, C-tick, PRS

Increase your motor's lifetime...
With ABB's softstarters, starting currents are easily optimized to your load, application and motor size.

...by protecting it from electrical stresses.
Over ten motor protection features are included to keep your motor safe from overloads and network irregularities.

RHOSS keeps air flowing with secured reliability
RHOSS, an HVAC specialist from Italy has managed to reduce the starting currents by 60% while keeping the short starting time that a scroll compressor needs.

Starting currents reduced by 60%

Reduce your installation time and panel size...
ABB's softstarters are easy to install thanks to their compact design and many built-in features.

...by having everything that you need built in.
Built-in bypass saves energy and space while reducing heat generation: a complete motor starting solution in one unit — designed and verified by ABB.

**Xylem - South Africa
ABB's softstarters providing efficiency to the mining industry**
Xylem Reducing the number of components by 80%, shortened installation time by 60%. Costs cut to half has helped Xylem sell twice as many panels with softstarters as before.

Total panel costs reduced by 50%

Reduce the number of production stops...
ABB's softstarters reduce mechanical stress on your application which increases uptime.

...by letting the softstarter do more than just starting.
Torque control, pump cleaning, motor break and many more features enables you to use your process to its full potential.

Yantai Guhe cuts costs by stopping pumps
Increasing application productivity at Yantai Guhe, a leading Chinese pump manufacturer, increasing productivity by solved water hammering with PSE and are now saving costs and winning orders.

Reduced maintenance costs by 40%
